

Department of Health, Exercise and Sports Sciences  
Exercise Physiology Laboratories

UNM's Exercise Science Program invites applications for masters- and doctoral-level studies in Exercise Science for the Fall semester of 2022. We are seeking highly motivated applicants who are a good fit for our program. We will have multiple, one-year renewable funded (stipend, tuition, health insurance) positions. We are particularly interested in strong candidates who have an interest one or more of the research areas listed below. Our working environment is collegial and collaborative.

- Environmental Physiology (heat and hypoxia)
- Body composition
- Skeletal muscle physiology
- Exercise training protocols
- Aging and sarcopenia
- Special populations (obese, diabetics, heart failure, cancer)

For further information regarding this opportunity or our MS-to-PhD option, contact Dr. Ann Gibson, graduate coordinator – [alg@unm.edu](mailto:alg@unm.edu).
