Kemper Diversity Child/Pediatric Postdoctoral Two-year Fellowship

The Center for Children's Healthy Lifestyles & Nutrition is offering a two-year postdoctoral fellowship specifically for individuals from diverse backgrounds as defined by the NIH (<https://grants.nih.gov/grants/guide/notice-files/NOT-OD-20-031.html>). Applicants will be accepted from the fields of Nutrition, Exercise Physiology, Public Health, Psychology, Physiology or related fields to work with our multidisciplinary team. This position is fully research, with hours toward clinical licensure only available after specific negotiation. All applicants must have completed all requirements for their doctoral degree prior to beginning the fellowship. The positions' start date is flexible, and salary will follow current NIH guidance. Our faculty study many facets of children's healthy lifestyles and nutrition and related topics, and span from public health to clinical intervention to basic science (see www.chlnkc.org for more information). Candidates will select a senior research mentor (i.e., Jordan Carlson, Delwyn Catley, Ann Davis, Helena Laroche, Lauren Ptomey, John Thyfault) and will have oversight from a 4-member scholarship oversight committee to ensure productivity and training related to the candidate's individualized career goals. We are specifically seeking candidates who plan to pursue NIH funding, likely by submitting a F, K or diversity supplement application during their fellowship. The Center for Children's Healthy Lifestyles & Nutrition is a joint partnership between the University of Kansas Medical Center (KUMC) and Children's Mercy Hospital (CMH). Postdoctoral fellows will have the support of the Office of Postdoctoral Affairs at KUMC (<http://www.kumc.edu/academic-and-student-affairs/opags/postdoctoral-affairs/prospective-postdocs.html>), as well as support from the NIH funded University of Kansas Clinical and Translational Science Institute (<http://www.kufrontiers.org/>), and from the postdoctoral training program at Children's Mercy Hospital.

HOW TO APPLY:

To apply, please submit the following documents to Ann Davis, PhD, MPH, ABPP at adavis6@kumc.edu: 1) A letter of interest identifying the position of interest, your qualifications, specific research interests, the name(s) of your desired senior mentor, and goals for the postdoctoral training years (maximum one page); 2) Curriculum vitae; 3) Three letters of recommendation. Applications will be reviewed immediately upon receipt. Candidates will be accepted for one year of employment, with successful candidates invited to stay for the second year.
