

Position Title: Contractor, Research Assistant (~20 hours/wk)

KUMC's Division of Physical Activity and Weight Management (DPAWM) is looking to hire a part-time, contracted, research assistant from the Wichita area to serve as an interventionist for a NIH funded research study titled MIGHTY.

MIGHTY is an 18-month weight management study for adults with mobility related disabilities. Participants are provided a diet plan, physical activity recommendations, and social interaction through one of two delivery methods: in-person (one-on-one) or remotely (Zoom) in a group. All participants are issued necessary equipment to complete the study (Fitbit, iPad, exercise equipment, etc.). To learn more, visit our webpage (<https://ebl.ku.edu/mighty>).

Job duties (~20 hr/wk):

- Review all study related documents (protocol, data collection forms, publications, etc.) and complete health educator training.
- Deliver study material to study participants in the Wichita area, which may include one-on-one visits or remotely delivered group (Zoom).
 - Reimbursement for travel is provided.
- Perform relevant research documentation and communicate with study coordinator.
- Maintain complete and accurate research documentation following division standard operating procedures and complying with IRB, HIPAA, and institutional policies.

Preferred qualifications:

- Bachelor's degree in exercise physiology, behavior, nutrition, public health, or related field.

If you're interested, please send your resume to Dr. Anna Gorczyca at agorczyca@kumc.edu.

Position Title: Research Assistant (contracted ~20 hours/wk)

We are looking to hire a health educator (HE) from the Wichita area to work on our weight management study for adults with mobility related disabilities (MIGHTY). The health educator is responsible for:

- Reviewing study related documents and completing HE training.
- Delivering study material to participants in the Wichita area (travel reimbursement).
- Following study protocol and leading behavior sessions to randomized intervention groups:
 - In-home: delivered one-on-one with participants
 - Group remote: delivered by Zoom to a group
- Performing relevant research data collection, communicating with study coordinator, following SOPs, and complying with IRB, HIPAA, and institutional policies.

Ideally, the health educator would have a bachelor's degree in a health-related field (psychology, exercise, nutrition, etc.). For more information about the MIGHTY study, visit our webpage:

<https://ebl.ku.edu/mighty>

Feel free to share this position posting with any relevant groups, organizations, or individuals.

If interested, please send your resume to Dr. Anna Gorczyca at agorczyca@kumc.edu.
